

## Paige Wire Silt Fence (Farm Fence)

Some applications require a stronger backing or a longer term situation this is where Paige Wire silt fence is available. Paige wire fence is made of tightly hinged joints that allow the fence to stretch and give over various terrain. Installed in the field a nonwoven geotextile is fastened to a farm fence and supported by evenly spaced t-posts. Cedar posts can be added for extra support.

Standard types (vertical strands are 12" apart with 10 horizontal wires):

- LD 1047-12-14. Top and bottom wire are 11 gauge, filler is 14 gauge (in stock)
- HD 1047-12-12 class 1. Top and bottom wire are 10 gauge, filler is 12.5 gauge (non stock)

*Many other types of wire fence are available on request to meet your needs.*
